ALUMINUM HOCKEY GOAL

SKU: 42100

- Fully welded
- With hardwood core
- With plastic covering
- With wheels
- Color: aluminum natural or white

PRODUCT DESCRIPTION

FULLY WELDED ALUMINUM HOCKEY GOAL

The TÜV-tested **hockey goal** made of aluminum has a size of 3.66 x 2.14 m and comes in the color aluminum nature or white. It is welded in one piece and thus has **high stability and durability**. The goal is made of profiles with dimensions of 75 x 50 mm. These are equipped with a hardwood core.

The barrier (46 cm high) is also made of aluminum and is filled with wood. In addition, it is poured with a **plastic coating**. The plastic coating has a noise-absorbing effect when the field hockey ball hits the goal. The aluminum field hockey goal also has **2 wheels** for transportation.

High quality milled net suspension

The hockey net is attached to the goal frame via a high-quality milled-in net suspension. This is **deburred on both sides** and has no sharp edges, so that the field hockey goal net can be mounted **extremely safely and without damaging the net**. The net is further

attached to the barrier by means of a rod system. For an extra charge, we also supply the rod system as a **lockable net safety device**.

Note: Goal net not included.
