

ALUMINUM YOUTH GOAL WITH WHEELS AND WEIGHTS

SKU: 30074-1

- Type PROTECTOR
- 5 x 2 m
- Color: natural aluminum
- Milled net suspension
- Optionally with ARENA net protection

PRODUCT DESCRIPTION

ALUMINUM YOUTH GOAL WITH ANTI-TILT DEVICE

The **aluminum youth goal** has a size of 5 x 2 m and is equipped **with wheels and weights**. The goal frame is made of an oval profile (100 x 120 x 2.5 mm) made of aluminum, while the ground frame is made of a rectangular profile measuring 80 x 60 x 3 mm. The goal is **fully welded** and has additional welded corner connectors. In combination with the high-quality welds, you get a very stable youth goal. The goal also has **net hoops**, resulting in the following projections: 0.80 m at the top and 1.00 m at the bottom.

The aluminum youth goal with wheels and weights also meets the requirements of FIFA as well as DFB (German Football Association). It is manufactured according to the valid DIN 748 and is **TÜV certified** (TÜV - German Association for Technical Inspection).

Note: Goal net not included.

Milled-in net attachment

The milled-in net attachment of the youth goal provides an **extremely firm and secure hold** of the net in the goal. The goal net is fixed directly in the goal frame profile so that no corners or edges protrude from the profile. The **double deburring** also ensures a net-friendly and precise fastening. The goal net is mounted to the ground frame with a tensioning rope or alternatively with a rod system (not included). For this purpose, the youth goal is equipped with wheels and weights with welded eyelets.

Our aluminium youth goals with milled net suspension can additionally be equipped with the **ARENA net protection**. The ARENA net protection is used to close the milled net cutout precisely and to protect the goal net against theft. The net is secured with a screw lock.

Anti-tilt system with wheels and weights

The anti-tilt system is bolted to the ground frame of the youth goal. It consists of an aluminum profile and a **robust steel core filling**. To ensure that the goal can be moved around the sports field despite the additional weight, it is equipped with **foamed-in-place pneumatic wheels** with a diameter of 250 mm. These have very good running properties, so that the youth goal can also be pushed over uneven surfaces. The goal is movable according to the width.

Youth goals in top quality from the manufacturer

With us you are guaranteed to find the optimal goal for your purpose: Whether aluminum youth goal with wheels and weights, soccer goals, training goals, recreational goals or even mini goals in different sizes - there is something for everyone! As a manufacturer of sports equipment, we attach great importance to quality and durability of our products. Just buy the suitable soccer goal in our webshop and let us convince you! You are also welcome to find out more about the technical details of our goals for youth soccer.
