

## COMPETITION GOAL WITH TENSION RODS

SKU: 30025

- Color: natural aluminum
- 7.32 x 2.44 m
- With tension rods
- Milled net suspension
- Optionally with ARENA net protection and protective sleeve

### PRODUCT DESCRIPTION

#### COMPETITION GOAL WITH TENSION RODS - MADE OF ALUMINUM

The competition goal with tension rods in the dimension **7.32 x 2.44 m** is firmly anchored in ground sockets. It also has a free net suspension via two tension rods. Like the soccer goal, the tension rods are anchored in ground sockets (not included) to guarantee a firm stand. Both the lower and upper depth of the goal (projection) is 2.00 m. The competition goal has exceptional stability and durability, which is achieved by a robust construction. The miters are firmly welded and welded corner connectors serve as adapters for the goal post.

The material and also the color of the soccer goal with tension rods is **aluminum**. The goal is made of strong oval profiles (100 x 120 mm) with a wall thickness of 2.5 mm.

**Required accessories:** ground frame, ground sockets, goal net (not included).

## With double deburred net suspension

The so-called premium net suspension refers to a high-quality double deburred milling in the aluminum profile. The net suspension is thus located inside the post and batten profiles, which minimizes the risk of injury. The net also holds firmly and securely in the goal while being protected by the smooth surface of the milling.

The competition goal with tension rods complies with the FIFA and DFB (German Football Association) regulations. Furthermore, we manufacture the soccer goal according to the valid DIN 748. The goal is also TÜV certified (TÜV – German Association for Technical Inspection), so the goal also complies with the applicable safety regulations.

**Required accessories:** ground frame, ground sockets, goal net (not included).

## Accessories for stationary soccer goals

The soccer goal can be optionally equipped with our ARENA net protection and protective sleeves. The **ARENA net protection** is used to close the net cutout precisely and secures the goal net against theft. It is fixed in place with a screw lock. The additionally welded-on **protective sleeve** made of aluminium guarantees an exact installation height of the stationary goal and at the same time prevents soiling of the ground sleeve.

## Top quality soccer goals and sports equipment

Buy competition goals with tension rods directly from the manufacturer! At artec® Sportgeräte you get everything your soccer heart desires.
