

## CURVED BARRIER RAIL

SKU: 45054

- Made of aluminum
- Round profile
- Weatherproof
- Length: 2.50 m

## PRODUCT DESCRIPTION

### CURVED BARRIER RAIL

The curved barrier rail is made of anodized aluminum. A round profile with a diameter of 60 mm and a wall thickness of 3 mm is used for production. The rail has an **length of 2.50 m**.

**Note:** We also offer complete barrier systems for a 400 m runway. Our team is at your disposal for an individual offer!

Please also inform yourself about the different designs of our barrier systems as well as the barriers with perimeter advertising.

**Component**

Barrier Bar
