

ECO-FRIENDLY SOCCER GOAL NET

SKU: 30587-1-PLA

- Biodegradable
- PLA 4 mm
- Knotless
- Projection: 200/200 cm
- Colour: white

PRODUCT DESCRIPTION

ECO-FRIENDLY SOCCER GOAL NET, PROJECTION: 200/200 CM

The **eco-goal net for competition goals** is made of **PLA** (polylactic acid). PLA is made from **renewable and natural raw materials** and, as a synthetic polymer, belongs to the group of polyesters. The soccer goal net is **biodegradable** in industrial composting plants. Due to the alternative disposal route, the net contributes to environmental protection and is a real alternative to conventional goal nets as an environmentally friendly soccer goal net.

Knotless eco-net for large field goals

The **soccer goal net** in **white** has a material thickness of 4 mm, is very hard-wearing and therefore ideal for everyday soccer use. It is suitable for soccer goals 7.32 x 2.44 m with a projection of 200/200 cm. Of course, the **eco-goal nets for environmental protection** are available for different projections!

For [soccer goals](#), in addition to eco-goal nets in one colour, we also have **two-colour nets**

in our range. To strengthen club identification, the soccer goal nets can also be purchased in club colours or with a club logo.
