- Colour: white

PRODUCT DESCRIPTION

ECO SOCCER GOAL NET 7.32 X 2.44 M, PROJECTION: 80/150 CM

The **eco-net for soccer goals** is made of **PLA** (polylactic acid). PLA is made from **renewable and natural raw materials** and, as a synthetic polymer, belongs to the group of polyesters. The soccer goal net is **biodegradable** in industrial composting plants. Due to the alternative disposal route, the eco-net contributes to environmental protection and is thus a real alternative to conventional goal nets.

Knotless eco-net for large field goals

The **white eco soccer goal net 7.32 x 2.44 m** has a material thickness of **4 mm**, is very durable and therefore ideal for everyday soccer. It is suitable for soccer goals 7.32 x 2.44 m with a projection of 80/150 cm. Of course, the **eco-goal nets for environmental protection** are available for different projections!

In addition to single-colour eco-goal nets, we also have two-colour nets in our range for

[soccer goals](#). To strengthen club identification, the soccer goal nets can also be purchased in club colours or with a club logo.
