

FULLY WELDED TRAINING GOAL

SKU: 30010

- 7.32 x 2.44 m
- Milled net suspension
- Rectangular profile in the bottom frame
- Color: natural aluminum
- Optionally with ARENA net protection

PRODUCT DESCRIPTION

PROFESSIONAL TRAINING GOAL

The fully welded **training goal** measures 7.32 x 2.44 m. It has extraordinary stability and is free-standing, which allows it to be used flexibly. However, the training goal must be secured against tipping over. For this purpose, the goal already has a **device for anchoring to the ground**. The upper projection of the goal is 0.80 m, the lower projection is 2.00 m.

The training goal is **completely welded** and has welded corner connectors, which creates a very stable overall construction. The goal post as well as the crossbar are made of an oval profile 100 x 120 x 2.5 mm. The ground frame, on the other hand, is made of a rectangular profile 80 x 60 x 3 mm with rounded corners. The net hoop profiles still have a dimension of 60 x 3.5 mm.

Fully welded training goal with careful net suspension

With the help of the **milled net suspension**, which is deburred twice, the goal net can be fixed very securely and gently in the goal frame profile. The safety of the athletes can be guaranteed, as there are **no sharp corners and edges** protruding from the aluminum profile. The goal net is also attached to the ground frame using a rod system (not included). There are already welded eyelets for this purpose.

The training goal is manufactured according to the applicable safety rules and thus complies with the specifications of FIFA and the DFB (German Football Association). You get a completely welded training goal with **TÜV certificate** (TÜV – German Association for Technical Inspection)!

Important note: Free-standing training goals must be secured against tipping over!

The pole system for fixing the goal net to the ground frame as well as the goal net are not included in the delivery.

The training goal in size 7.32 x 2.44 m can optionally be equipped with our **ARENA net protection**. The ARENA net protection is used to close the net groove precisely and to protect the goal net against theft. It is fixed in place with a screw lock.

Sports equipment and training goals directly from the manufacturer

Buy completely welded training goals directly from the manufacturer! At artec® Sportgeräte you get everything your soccer heart desires. As a manufacturer we attach great importance to the quality and durability of our goals and sports equipment. artec® offers you different soccer goals: Whether completely welded training goals, soccer goals 7.32 x 2.44 m, youth goals, robust recreational goals or even mini goals.
