- 7.32 x 2.44 m
- Strong aluminum profile
- Fully welded
- Safety net hooks

PRODUCT DESCRIPTION

GERMAN ARMY TRAINING GOAL WITH NET HOOKS

The **German Army training goal** comes from the easytec product line. The **easytec net suspension** includes extremely flat designed net hooks that can be quickly and easily installed in the aluminum profile. In contrast to the milled-in net suspension, this is the more cost-effective alternative for net attachment for customers. A secure hold of the goal net as well as a low risk of injury can still be guaranteed due to the **excellent design**.

The training goal is manufactured according to German Army standards and is **extremely sturdy**. This is achieved by the fact that the goal is fully welded and has a very high wall thickness of 4 to 6 mm in the ground frame. The corners are also reinforced with the help of welded corner connectors. The training goal also measures 7.32 x 2.44 m and has a **device for anchoring to the ground**. The projection at the top is 0.80 m, while the lower projection is still 2.00 m. The gate is made of high quality oval profiles 100 x 120 mm of robust aluminum. The thickness of the profile in the ground frame is 4 to 6 mm increasing.

Quality from the manufacturer

The training goal in the **German Army version** is certified by TÜV (TÜV – German Association for Technical Inspection). It is also manufactured according to the valid DIN standard 748 and meets the requirements of FIFA and DFB (German Football Association). Thus, the goal meets all safety requirements.

Important information: It is mandatory that the training goal is secured against tipping.

Required accessories (not included): Goal net, rod system for net attachment to the ground frame of the training goal according to German Army standard.
