

HEIGHT ADJUSTABLE BASKETBALL SYSTEM

SKU: 37561

- Without projection
- Height adjustment from 2.60 to 3.05 m
- Made of aluminum
- Single pole stand
- With backboard, hoop and net

PRODUCT DESCRIPTION

HEIGHT ADJUSTABLE BASKETBALL SYSTEM MADE OF ALUMINUM

The **height adjustable basketball system without projection** is made of oval aluminum profiles with a dimension of 100 x 120 mm. In addition, the adjustable single pole basketball system is **completely welded** to achieve the highest stability and long durability. The height of the system can be adjusted from **2.60 to 3.05 m** by means of an built-in compressed air cylinder (a ladder may be required). The desired height of the basketball hoop is fixed by an adjusting screw.

Important note: According to DIN EN 1270, basketball stands with a projection of less than 2.25 m must be equipped with a [protective pad](#).

With weatherproof backboard

The single-mast basketball system comes with a backboard measuring 1.20 x 0.90 m.

This is made of coplast and is weatherproof. The **steel basketball hoop** is galvanized and also powder coated in orange color. It is equipped with a basketball net made of nylon (6 mm diameter).

Besides complete basketball systems, you can get basketball stands, backboards, basketball hoops as well as basket nets separately. As a manufacturer, we are also happy to give you an overview of our various outdoor facilities for basketball!

Material	Aluminum
Color / Surface	Natural Aluminum
Structure	1-Post
Extension Arm	Without
Profile	Oval profile 100 x 120 mm
Height adjustment	Adjustable from 2.60 to 3.05 m
Basket and Backboard	With Basket and Backboard
Type target board	Made of coplast, 1.20 x 0.90 m
Basket Type	Steel, Color: Orange
Net Type	Nylon
Certification Mark	TÜV tested
