SKU: 30017-1-GB

- 7.32 x 2.44 m
- Projection 1.50 m
- Color: natural aluminum
- Milled net suspension
- Optionally with ARENA net protection

PRODUCT DESCRIPTION

HIGH QUALITY TRAINING GOAL MADE OF ALUMINUM

The **extremely high-quality training goal** PROTECTOR measures 7.32 x 2.44 m and is equipped with net hoops. This results in the following projections: 0.80 m at the top and 1.50 m at the bottom. The training goal is made of aluminum and also comes in **natural aluminum color**.

The goal bar as well as the goal posts are made of an oval profile 100 x 120 mm, which also has a wall thickness of 2.5 mm. The profile of the ground frame, on the other hand, is square with the dimension of 80 x 80 mm. The square profile has rounded edges for the safety of the athletes. Overall, the training goal is **robust and durable**. This is achieved in particular by the fact that the goal is welded in one piece. Additional welded corner connectors also ensure **high stability**.

Counterweight in the ground frame

The fully welded and robust training goal is **secured against tipping ex works**. The counterweight is located directly in the ground frame, so that no additional anti-tip device needs to be attached. To allow the goal to be moved around the field despite the counterweight, it also has two foam-filled pneumatic wheels that have very good running characteristics. The training goal is **movable according to its width**.

The goal net is mounted via a **milled net suspension**. This is deburred twice and has no sharp edges. The net can therefore be **securely fastened directly to the goal frame profile** in a manner that is gentle on the net. The net is mounted to the ground frame using welded-on eyelets and a rod system (not included).

Tested safety

Our high-quality training goal complies with the applicable safety regulations as well as the requirements of FIFA and DFB (German Football Association). It is manufactured according to the DIN standard and the **TÜV (TÜV - German Association for Technical Inspection) certificate**.

The pole system for net assembly and the goal net can be purchased separately.

The PROTECTOR soccer training goal can be optionally equipped with our **ARENA net protection**. The ARENA net protection is used to close the net groove precisely and to protect the goal net against theft. It is fixed in place with a screw lock.

Buy training goal and sports equipment directly from the manufacturer

At artec® Sportgeräte you get everything your soccer heart desires. As a manufacturer, we attach great importance to the quality and durability of our goals and sports equipment. artec® also offers you a variety of different goals: Whether training goals, soccer goals for competition, youth goals or even recreational goals and mini goals. Our assortment definitely leaves nothing to be desired! Just choose the right goal for your purposes in the webshop and let us convince you of the quality! Also, feel free to get more information

about the technical details of the goals for training.
