PRODUCT DESCRIPTION

HOCKEY GOAL WITH ANTI-TILT DEVICE AND ARTIFICIAL TURF BARRIER

The **hockey goal with anti-tilt device and artificial turf barrier** made of aluminum has a size of 3.66 x 2.14 m and comes in either natural aluminum or white. It is fully welded and therefore has a **high stability and durability**. The goal is made of profiles with a dimension of 75 x 50 mm. The goal frame is additionally equipped with a **wooden core**.

The 46 cm high border is made of aluminum and is also filled with wood. In addition, it is covered with high-quality **artificial turf**. This reduces the noise when the hockey ball hits the goal. The hockey goal also has integrated **weights to prevent it from tipping** and a total of fourt wheels for comfortable transport.

Safe and gentle net attachment

The net is attached to the goal frame profile by means of a high-quality **milled net**

suspension. This is deburred twice and has no sharp edges, so that the **hockey goal net** can be attached safely and without damaging the net. The net is also mounted on the board with the help of a rod system. For an extra charge, we also supply the rod system as a **lockable net safety device.**

Note: Goal net not included.

Material	Aluminum
