PRODUCT DESCRIPTION

FULLY WELDED HOCKEY GOAL WITH ARTIFICIAL TURF BARRIER

The **hockey goal with artificial turf barrier** is made of aluminum and has a size of 3.66 x 2.14 m. The goal is available in natural aluminum or white. Welded in one piece, the hockey goal has an extremely **high stability and durability**. The 75 x 50 mm profiles have a wooden core.

The goalpost (46 cm high) is also made of aluminum and filled with wood. It is also covered with an **artificial turf surface**. The artificial turf has a noise-absorbing effect when the hockey ball hits the goal. The hockey goal also has **2 wheels** for easy transport.

High quality milled-in net suspension

The hockey goal net is attached to the goal frame via a high-quality milled-in net suspension. This is **deburred on both sides** and has no sharp edges, so that the hockey goal net can be mounted extremely safely and **without damaging the net**. The net is also

attached to the board with the help of a rod system. For an extra charge, we also supply the rod system as a **lockable net safety device**.

Note: Goal net not included.
