

MOBILE BASKETBALL STAND

SKU: 37545-1

- 1.65 m projection
- Mobile
- With counterweights
- TÜV tested

PRODUCT DESCRIPTION

MOBILE BASKETBALL STAND FOR OUTDOOR USE

Our mobile basketball stand is made of high-quality aluminum profiles, has a projection of 1.65 m and is TÜV-tested. The ground frame and the outrigger are each welded in one piece, which gives the unit extraordinary stability. The outrigger can also be folded down.

The basketball system can be combined with a [Coplast backboard in the size 1.80 x 1.05 m](#). In addition, e.g. a [galvanized and powder-coated steel basketball hoop](#) incl. [nylon net](#) is required. We have already arranged a [mobile basketball system](#) incl. backboard, hoop and net for you.

Important note: Basketball stands with a lower projection than 2.25 m must be equipped with a [protective pad](#) according to DIN EN 1270.

Mobile basketball stand with transport roller

In order to achieve **high stability**, the mobile basketball stand is equipped with a **weight**

box and counterweights. Due to the use of extra wide polyamide double rollers, the basketball stand is movable. For transportation, a receptacle for a lifting and transport roller is attached. The [lifting and transport roller](#) is not included and must be purchased separately.

Basketball equipment directly from the manufacturer

In addition to basketball stands, you can also buy [fully equipped basketball systems](#) from us. This way you can be sure that the [basketball stands](#), the [backboard](#) and the [basketball hoop](#) fit together and meet the prescribed safety requirements. On our homepage you can find out more about our different [types of outdoor basketball systems](#).
