- Available in all sizes

## PRODUCT DESCRIPTION

### MOBILE SAFETY COVER FOR POLE VAULT LANDING AREAS

The mobile **safety cover** for pole vault landing areas in two-part design is made of aluminum. The roof and side surfaces come with welded-in board profiles. By sealing the individual profiles, the cover is also **waterproof** and therefore weatherproof. In the center there is a gutter for the drainage of rainwater. The safety cover is mobile due to **internal double running wheels**. The wheel axles are welded into the frame.

**Note:** The mobile cover is available for all mat sizes (also custom made).

<b>Version</b>	For non-folding mats
<b>Construction load</b>	300 kg/qm
<b>Tilt goal opening</b>	Without tilt goal opening
<b>Steering device</b>	Without steering device
