

POLYMER CONCRETE SAND TRAP

SKU: 50360-An

- 1000/500/140 mm
- For long jump pits
- Edging on one side
- Reduces fouling

PRODUCT DESCRIPTION

POLYMER CONCRETE SAND TRAP, LENGTH: 1.0 M

The **sand trap** made of polymer concrete has a dimension of **1000/500/140 mm**. It is used for demarcation of long jump pits and reduces the pollution of the running track. The sand trap has the following features:

- **Upstand on one side**
- With prefabricated drainage possibility
- Cover made of galvanized **plug-in metal grating and rubber mat**
- Rounded edges, $r = 10 \text{ m}$
- Very robust construction for long durability
- In use in many stadiums and sports facilities worldwide

In addition to sand traps, soft edging stones are also required for edging long jump pits. As a manufacturer of sports equipment, we also provide our customers with further information about the various products for long jump facilities.
