PRODUCT DESCRIPTION

RECREATIONAL GOAL WITH ALUMINUM STRUTS AND SAND FILLING

The **recreational goal in the size 5 x 2 m** has a closed back frame and is equipped with robust aluminum struts with integrated sand filling. The sand filling enables **very good noise reduction** when the ball hits the goal. Furthermore, the goal frame of the soccer goal consists of an oval 100 x 120 mm profile, which has a high wall thickness and is processed in a high-quality manner. This creates an extraordinarily stable and durable soccer goal for sports grounds, playgrounds and soccer fields.

Durable recreational goal

The premium class recreational goal is **fully welded** and reinforced several times. This goal is manufactured exclusively in Germany and offers outstanding quality due to its robust construction. **TÜV-tested** (TÜV - German Association for Technical Inspection), this goal meets the currently valid FIFA and DFB (German Football Association) requirements
