- 5 x 2 m
- Projection 2.00 m
- Fully welded
- Safety net hooks

PRODUCT DESCRIPTION

STURDY ALUMINUM YOUTH GOAL WITH NET HOOKS

The **extremely sturdy aluminum youth goal**, which is made of aluminum, is of **exceptional quality**. It is characterized by the fact that it is welded in one piece and the profiles used have a strong wall thickness. The goal post as well as the goal bar are made of an oval profile with the dimensions of 100 x 120 mm. Welded corner connectors provide additional **stability**.

The ground frame is made of a rectangular profile (80 x 60 mm). For the **safety of the athletes**, the edges of this aluminum profile are rounded. The net hoops are still made of round tube with a diameter of 60 mm and a profile thickness of 3.5 mm. The projection of the sturdy aluminum youth goal is 0.80 m (top) and 2.00 m (bottom).

Note: Goal net not included.

The **aluminum youth goal** is extremely stable and is manufactured in Germany according to the valid DIN 748. It is also awarded with the **TÜV certificate** (TÜV - German Association for Technical Inspection).

The net suspension of this youth goal is done by **safety net hooks**, which are designed extremely flat. As a result, the plastic hooks protrude only slightly from the goal frame profile. With the help of the net hooks, the net can be installed quickly and easily. On the other hand, the net is attached to the ground frame using a rod system (not included). For this purpose, the sturdy youth goal -easytec- is already equipped with welded eyelets.

Note: The youth goal made of aluminum -easytec- must absolutely be **secured against tipping**. For this purpose, the goal has a device for ground anchoring (e.g. for ground pegs/spirals).

Sturdy youth goal from the manufacturer

Buy sturdy aluminum youth goals directly from the manufacturer!
