SKU: 30017-1E-GB

- 7.32 x 2.44 m
- Projection 1.50 m
- Color: natural aluminum
- Safety net hooks

PRODUCT DESCRIPTION

DURABLE AND STURDY TRAINING GOAL

The goal net of the training goal is mounted to the goal frame via very **flat designed safety net hooks** made of plastic. These can be attached quickly and easily in the aluminum profile, so that the net has a **firm hold in the goal**. The net is also mounted to the ground frame via eyelets that are already welded on, as well as via a rod system (not included).

Extremely **robust training goal** PROTECTOR in size **7.32 x 2.44 m**. The goal is supplied with net hoops. This results in an upper projection of 0.80 m and a lower projection of 1.50 m. The training goal is made of aluminum and comes in natural aluminum color.

The goal frame is made of an oval profile 100 x 120 mm. The profile of the ground frame, on the other hand, is square (80 x 80 mm). This profile has **rounded edges** for the safety of athletes. The overall construction of the training gate is robust and durable. This is mainly achieved by the fact that the goal is **fully welded**. The welded corner connectors additionally ensure **high stability and durability**.

Counterweight integrated in the ground frame

The robust training goal with net hooks is already **secured against tipping ex works**. The counterweight is integrated in the ground frame, so that no further anti-tilt device needs to be attached. For flexible use, it also has **two special wheels** (foamed air wheels), which have extremely good running characteristics. The training goal -easytec- is movable according to the width.

The training goal complies with the **applicable safety regulations** as well as FIFA and DFB (German Football Association) requirements. It is manufactured in Germany in accordance with DIN standard 748 and also has a **TÜV certificate** (TÜV - German Association for Technical Inspection).

Note: The pole system for net mounting on the ground frame as well as the goal net can be purchased separately.
