

TRAINING SOCCER GOAL WITH COUNTERWEIGHT TYPE PROTECTOR -EASYTEC-

SKU: 30017-E-GB

- 7.32 x 2.44 m
- Safety net hooks
- Weight in bottom frame
- Fully welded

PRODUCT DESCRIPTION

FULLY WELDED TRAINING GOAL

In the easytec version, the **training goal with counterweight** has extremely flat plastic **safety net hooks**. The installation of the net hooks and thus also of the goal net is quick and easy. Due to the excellent construction, the safety of the athletes is also ensured.

The training goal with counterweight in the ground frame is **welded in one piece** and is extremely **robust and durable** due to the strong wall thickness of the aluminum profiles. The goal frame is made of oval profiles measuring 100 x 120 mm, while the ground frame is made of a square profile 80 x 80 mm. Due to the presence of the net hoops, the goal has the following projections: 0.80 m at the top, 2.00 m at the bottom. The training goal also comes in **natural aluminum color**.

Training goal with counterweight in the ground frame

The counterweight of the training goal is located directly in the ground frame.

Furthermore, the goal is equipped with special wheels (foamed air wheels), which enable **very good maneuverability** on the sports field. The training goal can be moved according to its width. In addition, when tilted, it can be moved easily, e.g. over troughs.

The training goal with counterweight in the bottom frame meets all requirements of the DFB (German Football Association) and FIFA. It is manufactured according to the valid DIN standard 748. It also has a **TÜV (TÜV - German Association for Technical Inspection) certificate**.

Not included in the scope of delivery of the training goal are the bar system for secure goal net attachment to the ground frame as well as the soccer ball goal net itself.

Buy training goals and more directly from the manufacturer
