SKU: 30017-E-GB-OV

- 7.32 x 2.44 m
- Fully welded
- Safety net hooks
- Color: natural aluminum

### PRODUCT DESCRIPTION

#### TRAINING GOAL WITH WEIGHT IN THE GROUND FRAME AND NET HOOKS

The **training goal with weight in the ground frame** measures 7.32 x 2.44 m and has extremely flat constructed **safety net hooks**. With the help of the net hooks, the goal net can be quickly and easily attached to the goal frame. In addition, the net is mounted to the ground frame via a rod system (not included). For this purpose, the training goal already comes with welded eyelets.

The training goal is fully welded and **made of aluminum**. It has net hoops, so that an upper projection of 0.80 m and a lower projection of 2.00 m results. Both the ground frame and the goal frame are made of an oval profile 100 x 120 mm. The training goal with weight in the ground frame comes with additionally welded corner connectors. This gives the goal an extremely high **stability and durability**.

## Weight in the ground frame

The training goal is equipped with a weight in the bottom frame. In order for the goal to be mobile and flexible despite the additional weight, it is equipped **with two wheels**. These foamed air wheels ensure optimal running properties (also e.g. through troughs). The training goal can be moved widthwise on the court when tilted.

The sturdy training goal with weight in the ground frame is manufactured according to the DIN standard 748 and thus complies with the rules of FIFA and DFB (German Football Association). In addition, the goal is **TÜV certified** (TÜV - German Association for Technical Inspection).

Not included in the scope of delivery of the training goal are the soccer goal net and the tension rope or the rod system for net securing.

## Training goals and sports equipment in top quality
